Brainstorming topic ideas

PROMPT

I teach a French as a foreign language (FLE) course on the environment to university students.

Here is my plan:

- listening comprehension 1 on eco-friendly hotels,
- listening comprehension 2 on a film about the environment,
- reading comprehension 3, in which students look for an eco-responsible restaurant,
- reading comprehension 4, with no document for now.

I am looking for an article for reading comprehension 4. My students are at [CEFR LEVEL] and study [DISCIPLINE]. Can you suggest about fifteen topics for reading comprehension 4 that are not covered in the other activities? They should interest my students, be out of the ordinary and be useful in everyday or professional life. For each topic, explain its value in one sentence.
